CUBO gamma 130 hoog

CUBO bestaat in 70 – 100 – 130 hoog

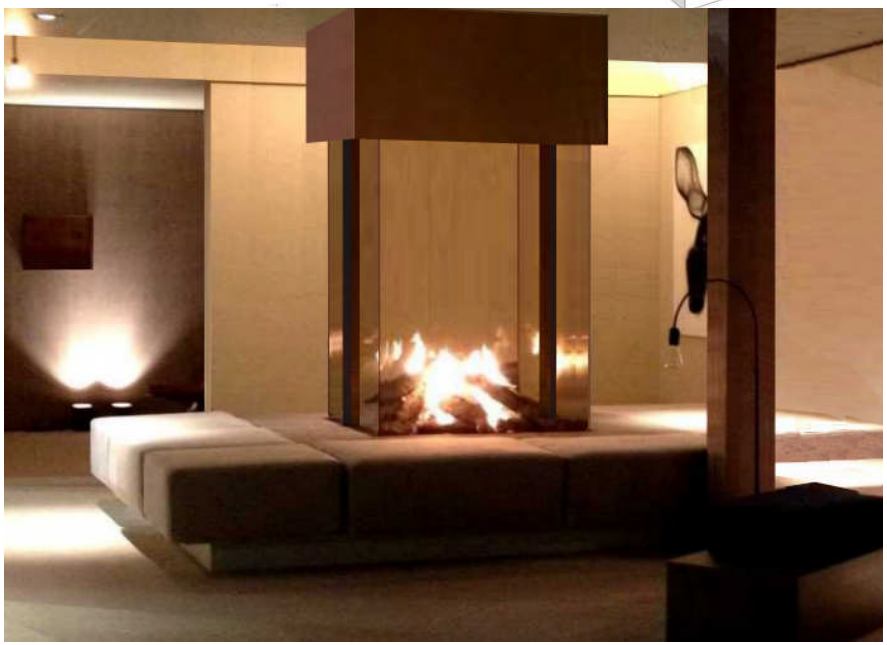

COSYFLAME
grensverleggend innovatief in gashaarden

met TWEE branders rug aan rug waarvan een kan uitgeschakeld worden
enkel op aardgas met normaal glas en enkel dak afvoer > niet naar gevel
met COSYFLAME OCTOPUS kan men tot 30 m ver naar alle kanten uit

CUBO

REUZE dubbelzijdige gashaarden met 2 branders

UNIEK : naar keuze doorkijken of niet doorkijken

CUBO komt in drie hoogtes : 70 – 100 – 130 H steeds 100 B x 100 D cm (steeds aardgas en aansluiting naar dak)

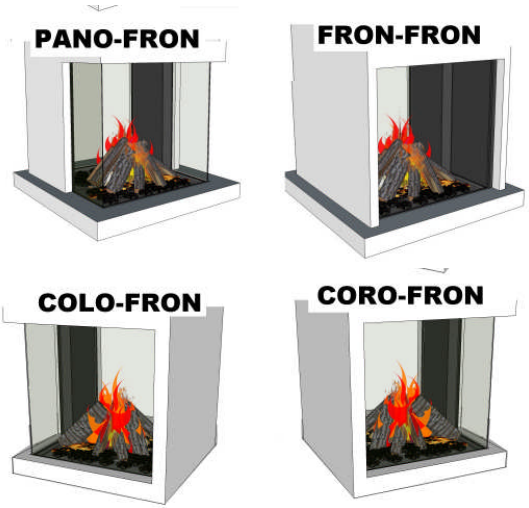

Deze gashaarden van een compleet nieuw concept kunnen uitgerust worden met 2 tot 6 ruiten = 4 tot 0 gesloten zijden
De haarden kunnen centraal, tegen de wand, tussen de wanden of als dubbelzijdige of doorkijk haard geplaatst worden.

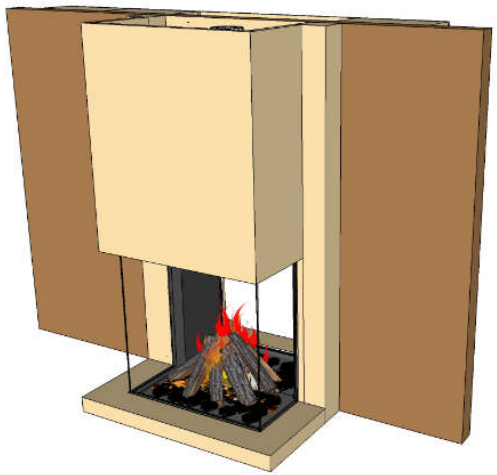

De voorzijde kan een fronthaard , een hoekhaard of een panoramische haard zijn en dezelfde keuze voor de achterzijde
Twee branders met hoge 'hout' vlammen: de brander van de achterzijde kan al dan niet branden - alles afstandsbediend
De haarden zijn ideaal als grote doorkijkhaard van 100 cm breed en naar keus 70 / 100 / 130 hoog

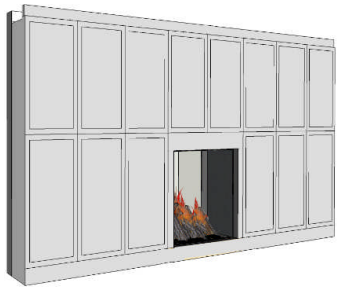

- > bij FRON-PANO kan men een wand- meubel plaatsen van 40 tot 60 cm diep aan één zijde
- > bij COLO of CORO-PANO kan men een wand- meubel plaatsen van 40 tot 60 cm diep aan beide zijden
- > bij FRON-FRON kan men de haard tussen wandmeubels plaatsen van 40 / 60 cm diep aan beide zijden

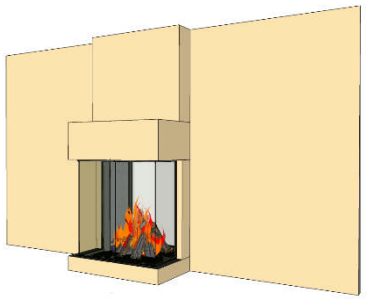

NOG NOOIT GEZIEN : Als optie kan men kiezen voor het NIET doorkijken zodat men een mooier vlammenbeeld heeft tegen een donkere rug en men vanuit de zetel ook niet voortdurend kijkt op de stoelen van de eetkamer, bureel of keuken aan de andere zijde

op de laatste pagina enkele schetsen en doorsnede met afmetingen

COMBINATIE PAR + CONC.

naar dak concentrisch deel max 8 m
renovatie deel + conc deel = maxi 20 m
horizontaal < 8 m en korter dan verticaal

WARWIS op toestel
+ 2 kW meer warmte
afgifte in de woning

DISCRETO ANDERE

met unieke dubbele GOLIATH brander zonder waakvlam – waarvan één uit te schakelen - met grote houtstammen - afstandsbediening
Goliath G4-60 20 belasting aardgas G20 = 2 x 6.9 à 10.7 kW Vermogen 2 x 7.2 à 8.1 kW Vermogen vloeiend regelbaar 5 tot 15 kW
De werkelijke warmteafgifte hangt sterk af van= de wijze van inbouw - de in- en uitlaatroosters - de centrale (of niet) situatie in het lokaal

Gasleiding -- tot 15 m naar teller = 20/22 mm diameter zo niet groter. In zelfde lokaal (op maxi 1 m) wordt een gaskraan 1/2 " geplaatst en een stopcontact > beide goed bereikbaar achter luik of rooster. Er komt ook sturingsdoos + transfo >24 V + gasblok naast het toestel
in schouwmantel 600 cm² inlaatroosters + 600 cm² uitlaatroosters voor convectie van de geproduceerde warmte naar het lokaal

COSYFLAME

CUBO FRON-PANO **met dieptekader geplaatst als dubbelzijdige haard tussen twee lokalen**

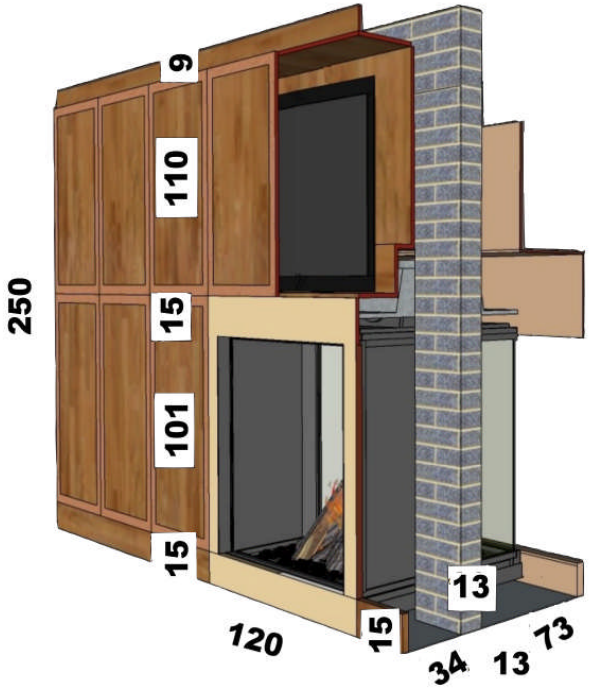

Normaal wordt dit toestel ingebouwd in omkasting van 120 x 120 cm overmeten (3 à 5 cm dikte omkasting) :let wel: schetsen en doorsnede met haard 100 hoog
De centrale kolommen komen dan ook binnen die omkasting. De basis van het toestel is 11 cm hoog + 3 cm voor de aansluiting > kan gelijk met de vloer indien put van 15 cm diep

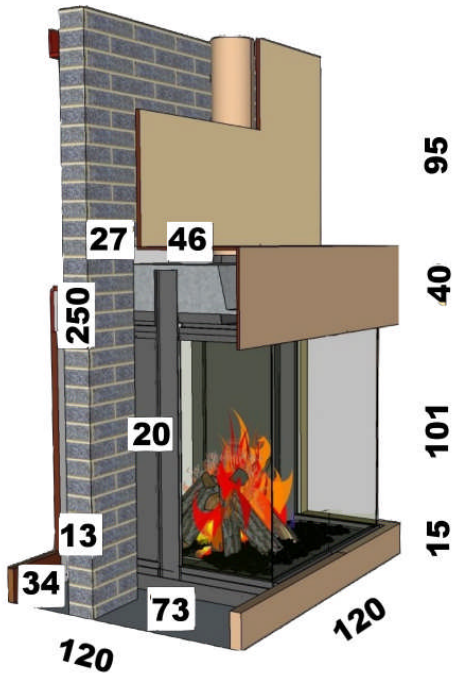

het toestel aangesloten wordt op een schouwkanaal dat VOOR de wand staat ; Komt de omkasting van de haard 73 cm vooruit overmeten.
Bij een wand van 13 cm dik zit de haard met dieptekader 34 cm door de muur .Te verrekenen bij afwijkende dikte van muur en geen dieptekader

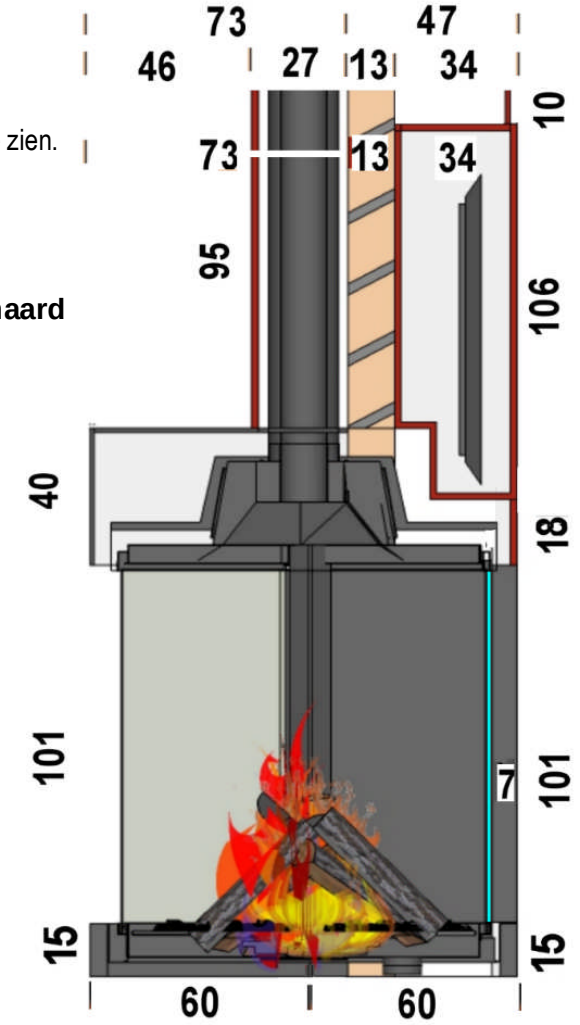

De omkasting komt - overmeten - minstens vooruit : 27 cm indien men de buis wil inkleden 20 cm indien men de kolommen naast de ruit wil inkleden

De haardopening is 71 - 101 – 131 cm hoog . De omkasting boven de haard is minstens 40 cm hoog overmeten

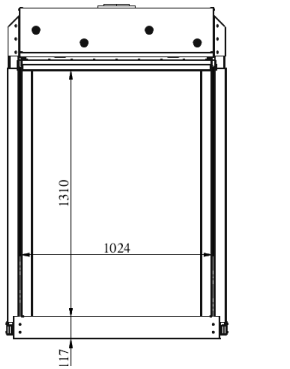

De CUBO PANO-FRON is standaard geleverd als DOORKIJK
Doordat het toestel – als enige ter wereld - toch twee branders heeft is het niet noodzakelijk dat het toestel doorkijk is om de vlammen te zien.
Als optie kan men het toestel als DUBBELZIJDIG bestellen.
De vlammen komen véél beter tot hun recht en men kijkt niet voortdurend door de haard naar het lokaal aan de andere kant.
Een brander brandt steeds, de andere kan men wel of niet mee aanmaken met de afstandsbediening
Hieronder de afmetingen en centrale doorsnede van de schets van een CUBO 100 PANO-FRON met kasten aan achterzijde
De kant PANO kan perfect vervangen worden door een hoekhaard COLO of CORO en FRON als vlakke haard
