DROP THE ACT

IN UGANDA

THANK YOU FOR YOUR SUPPORT

Lemahieu group NV made a positive impact in 2021 and worked with us at CO2logic to help protect our planet and the life it holds.

UGANDA WATER PROJECT

In Uganda acces to clean water is scarce. The only option for many rural Ugandan people is to use wood fuel to boil and purify water from polluted sources. This process is not only unsafe and unhealthy, it also results in deforestation and the release of greenhouse gases. By providing safe water, this project improves the health of the local communities and reduces deforestation.

REHABILITATION OF WELLS

The project repairs damaged wells and also drills new ones. Wells are available to local families, where clean water can be accessed through a borehole.

ENVIRONMENTAL IMPACT

Eliminating the use of firewood drops CO_2 emissions globally. On a local scale, the project protects forests in Uganda, which provide important ecosystem services and improve agriculture.

IMPROVING LIVELIHOODS

The project has an important impact on health and livelihood. Women are the ones who benefit the most from the positive impacts of the project, by saving time and money.

Your positive impact with CO2logic:

1 Million LITERS CLEAN WATER

499 PEOPLE

780,5 TONNES OF CO_2 AVOIDED

4,94 HECTARES PRESERVED

Gold Standard®

The Uganda Water project is in line with the United Nations Sustainable Development Goals.
