

PORT TERMINAL

Brussels • Belgium

Case

Tourists arriving at the port of Brussels on a cruise ship can now do so with style. They are no longer obliged to get off the boat in an industrial area because there is now a special passenger terminal where the cruise ship can dock so passengers can get out comfortably.

For the protection of metal constructions, the paint system Libert Mixtane Sparkle was chosen.

Paint systems

Shed:

- **Cryltane CF Impregnation** till saturation
- **Cryltane DTS 'Port de Bxl'** 80 microns
- **Mixtane Sparkle Gold** 50 microns
