

SNOWPLOW BLADES

Rémincourt • Belgium

Case-story

Snowplow blades from the Rémincourt municipal administration for a 'second life', requiring a paint system that is highly resistant to salty moisture.

Paint system

Application of **Polyzinc** on the same day.
After transport to the end customer:

- 1 layer of **Polyguard** applied by spray gun and diluted with 10% **Solvatane** (2 wet-in-wet passes).
- 2 layers **Mixtane Spray** gloss RAL 2008.
- After reassembling the lower rubber strips, a light mist layer of **Mixtane** to repair damage caused by tightening various nuts and bolts.
