

METEOR

THE MULTIFUNCTION CONTROL
PANEL FOR YOUR COMFORT

THERMOREGULATION

The Meteor panel is equipped with thermoregulated filtration. Thanks to it, opt for an intelligent management of the filtration pump according to the water temperature!

A PANEL TO SERVE YOU

With this multifunction control panel you have the power to decide beforehand when the filtration pump, your lights or your water treatment should be on. Meteor adapts its operation according to your settings.

MULTIFUNCTION

The Meteor panel is equipped with a host of features enabling it to replace up to 5 panels in its basic version, and even more with the options!

A WIDE RANGE OF FUNCTIONS FOR POOLS IN AUTOMATIC MODE

Smart, connected antenna supplied,
for connection to the Meteor panel

Control of Meteor functions
from the Vigipool application

Supplied with 5 metres of cable
Can be placed outside the room

Simple, intuitive control
with a single button

VIGIPOOL: THE TECHNICAL ROOM IN YOUR TELEPHONE

Vigipool is your new smartphone application that lets you keep your equipment room in your pocket at all times. With this application, you can centralise your equipment in the technical room and control your devices connected to the home's Wifi from anywhere in the world. With Vigipool, you can configure your Meteor VP box from A to Z: filtration mode, times for switching on floodlights, switching on the heat pump, etc.

AN EVOLUTIVE SOLUTION: For an even more complete installation, add Vigipool-compatible devices to your technical room and view new functions in your application: add an Ofix VP (pH / ORP analyser) and view the essential elements of water treatment in the application.
